

VEO Release Notes

October 2017

The latest multi-application VEO release adds support for extended customization of VEO Commissioning Items, Issues, Checklists, and Inspections.

In addition to platform compatibility updates, this document highlights what has changed for each application:

Contact your VEO account manager or support@m-six.com if you have any questions.

VEO Web

- Updated UI layouts make it easier to find what you're looking for.
- Action and linked entity buttons have moved.
- Issues are now sorted by ID.
 - *You can continue to use the Sort By menu to change how Issues are sorted.*

The image displays two screenshots of the VEO Web interface. The top screenshot shows a list view of inspections with columns for Status, ID, Inspection Type, Location, Scheduled Time, and Responsible Person. A specific inspection, 'Insp-00039', is highlighted with a 'Failed' status. Below the list, there are fields for Plan Sheet, Discipline, RFI, Submittal #, and CSI Spec Section. A toolbar at the bottom contains buttons for 'Print', 'Reassign', and 'Update Status'. A red callout box points to this toolbar with the text: 'Find actions like Update Status, Reassign, and Print, here...'. The bottom screenshot shows a detailed view of the 'Insp-00039: Failed' inspection. It includes a table with columns for Inspection Type, Scheduled Time, Responsible Team, and Subcontractor. Below the table are sections for Location, Note, Discipline, Plan Sheet, CSI Spec Section, RFI, Submittal #, Last Modified, Created, and Created By. A red callout box points to a toolbar in the top right corner of this view, which contains icons for attachments, comments, and linked issues, with the text: 'Look here for attachments, comments, and linked Issues, Inspections, or Checklists...'. The interface also includes a 'Save Changes' button and a user dropdown menu.

VEO Release Notes

October 2017
